Please see below for the step by step instruction sheet to help you navigate this change for:

Mozilla Firefox

1. In the address bar, type "about:config" and hit enter.

<u>F</u> ile	Ec	lit	View	History	<u>B</u> ookmarks	Tools	<u>H</u> elp	
4) (a	about:c	onfig				
4 7	0 ir	nfo	.(3) n	ioname(1)			

2. In the "Search" field, enter "tls". Find and double-click the entry for "security.tls.version.min".

about:config × +		
Sea <u>r</u> ch tls		
Preference Name	^	Status
network.http.spdy.enforce-tls-profile		default
network.proxy.proxy_over_tls		default
security.tls.version.fallback-limit		default
security.tls.version.max		default
security.tls.version.min		default
services.sync.prefs.sync.security.tls.version.max		default
services.sync.prefs.sync.security.tls.version.min		default

3. Set the integer value to "2" to force a minimum protocol of TLS 1.1 (entering "3" would force TLS 1.2).

	Enter int	eger value	×
security	.tls.version.m	in	
	ОК	Cancel	

4. This configuration will now show the new value and will take effect immediately (don't forget to clear your cache).

security.tis.version.tallback-limit	default
security.tls.version.max	default
security.tls.version.min	user set
services.sync.prefs.sync.security.tls.version.max	default
services.sync.prefs.sync.security.tls.version.min	default
